SKILLS SUMMARY

Transitioning into a software/web development career where I can use my logical, analytical learning abilities to build and maintain quality applications that maximize user engagement. Prior experience in a fast paced, detail oriented, team based profession where our priority was to find a way to say yes(make a solution). My personal interests in technology, software, and lifetime learning will be a valuable asset to your development team.

<u>Tools/Technologies</u>: Academic/personal experience in Java, HTML, CSS, JavaScript, MySQL, PHP, Apache/WAMP, Eclipse, Oracle SQL.
<u>Systems</u>: Windows(extensive), Linux(novice), MacOS(extensive), Windows Server(novice), Android(extensive).
